CONTENTS

Editorial
Strategy, policy and tactics in productive systems
A. Artiba and A. Guinet xi

Production Planning
Lot-sizing problem with setup times in labor-based capacity production systems
E.-H. Aghezzaf 1
Maximizing benefits in short-term planning in bottle-glass industry
P. Richard and C. Proust 11
The overlapping production planning: A new approach of bounded capacity management
Z. Bahroun, J.-P. Campagne and M. Moalla 21
Co-operative production planning for small- and medium-sized enterprises
I. Mezgár, G.L. Kovács and P. Paganelli 37
An LP-based approach for loading and routing in a flexible assembly line
T. Sawik 49
Economic production quantity model for items with imperfect quality
M.K. Salameh and M.Y. Jaber 59
A cooperative production planning method in the field of continuous process plants
C. Resteanu, F.-G. Filip, S. Stanescu and C. Ionescu 65
Developing manufacturing management strategies: Influence of technology and other issues
S.K. Banerjee 79
Flow simulation and genetic algorithm as optimization tools
F. Fontanili, A. Vincent and R. Ponsonnet 91

Sequencing and Scheduling
Hybrid flow shop scheduling with precedence constraints and time lags to minimize maximum lateness
V. Botta-Genoulaz 101
A branch-and-bound algorithm for the hybrid flowshop
O. Moursli and Y. Pochet 113
Integrated scheduling, assembly area- and part-assignment for large-scale, make-to-order assemblies
R. Kolisch 127
A two-phase heuristic approach to the permutation flow-shop scheduling problem
S.M.A. Suliman 143
Optimal start times under stochastic activity durations
S.E. Elmaghraby, A.A. Ferreira and L.V. Tavares 153
A new heuristic based on a hypergraph representation for the tool switching problem
H. Djellab, K. Djellab and M. Gourgand 165
Spatial decomposition for a multi-facility production and distribution problem
C. Dhaenens-Flipo 177
An exact method for cost-oriented assembly line balancing
M. Amen 187

Performance Measurement and Evaluation
Measuring the performance of lot-sizing techniques in uncertain environments
J. Jeunet and N. Jonard 197
Indicators for measuring performances of morphology and material handling systems in flexible manufacturing systems
O. Devise and H. Pierreval 209
Performance evaluation and design of a CONWIP system with inspections
C. Duri, Y. Frein and H.-S. Lee 219
Quantitative models for performance measurement system
P. Suwignjo, U.S. Bititci and A.S. Carrie 231
Work-force management in automated assembly systems
F. Croci, M. Perona and A. Pozzetti 243
Customer order lead times for production based on lead time and tardiness costs
J.W.M. Bertrand and H.P.G. van Ooijen 257

Cell Formation and Operation
Cell formation using evolutionary algorithms with certain constraints
M.-F. Plaquin and H. Pierreval 267
Cell formation with alternative process plans and machine capacity constraints: A new combined approach
C. Caux, R. Bruniaux and H. Pierreval 279
Modeling and simulation of the control framework on a flexible manufacturing system
C. Gertosio, N. Mebarki and A. Dussauchoy 285

Concurrent Engineering
Experiences with a concurrent engineering self-assessment tool
R. Van Landeghem 295
A concurrent engineering approach to chemical process design
P.M. Herder and M.P.C. Weijnen 311

Information Systems
The selection of information systems for production management: An evolving problem
R. Beach, A.P. Muhlemann, D.H.R. Price, A. Paterson and J.A. Sharp 319
An integrated modelling approach for complex applications and distributed information systems
F. Gargouri, N. Haddar, C.F. Ducateau and W. Gargouri 331
An information system for building production management
F. Ameziane 345

Quality Management and Fault Diagnosis
Future production systems: Influence of self-organization on approaches to quality engineering
P. Massotte and R. Bataille 359
Generalized inspection strategy for randomly failing systems subjected to random shocks
A. Chelbi and D. Ait-Kadi 379

Logistic Management
A robust optimization model for stochastic logistic problems
C.-S. Yu and H.-L. Li 385

Industrial Applications
The feeder rack assignment problem in PCB assembly: A case study
C. Klomp, J. van de Klundert, F.C.R. Spieksma and S. Voogt 399
The two level master production schedule and planning bills in a just in time MRP context
S. Lamouri and A. Thomas 409

Diary of Events 417
Author Index to Volume 64 419
